Title: (photo-Narrative) From Black bags to....

Theme: MDG1 Eradicate poverty

Text: The Black Bag project, a self help intervention at a local Palliative Care Centre in South Africa which focuses on poverty alleviation for impoverished women living with HIV/AIDS in resource poor contexts. The project is viewed as an enabler of occupations by:

- creating a novel remunerative occupation
- changing occupational patterns and routine
- requiring goal directed behaviour
- changing self concept

This presentation is seen through the eyes of a woman involved in this project, and her self styled narrative, as she embarks upon this enabling journey away from worthlessness and hopelessness.  
Format: Presentation
